AprilTag 36h11 Calibration Sheet | World frame W = tag 200

Tag size	90.00 mm (black border outer edge = detector tag_size) 112.50 mm including white border, cell = 11.25 mm
Layout	ID 300-309: 5 rows x 2 columns, center spacing 150.00 mm ID 200, 300, 301 lie on one straight line
Tag frame	AprilTag 3 convention: origin = tag center +x right, +y down (as printed), +z into paper
Orientation	All tags coplanar and identically oriented w.r.t. W: $R_W = I$, $rpy = (0, 0, 0)$ deg, $q(w,x,y,z) = (1, 0, 0, 0)$
Position	x, y, z under each tag = tag center position in W [mm]
Lines	Thin lines connect tag centers (interrupted at tags)
Print	100% actual size, no fit-to-page. Re-measure after printing.
